If a family supplies nearly all its wants within fined, it don't need to sell a great stal to have measy out at interest. While if the next family devotes all its energies to producing wheat for instance, though it may raise great crops, yet it may be always harrassed for money, and be comparatively poor. [Prolonged applauses and loud scalamation.] THE SIGNAL SUCCESSES OF GARIBALDI.

[From the London Times.]

Only a few weeks ago the position of Garibald in Calabria senied an action one. Even his friends were beginning to look gloomy, and to prophery ill. "You expect the much from Garibaid," they told us; "he is a here, and he has a great deal of luck, too, but he cannot do sucrything." It was a question whether he had not undertuken an impracticable acheme. Let him get his 90,000 men down the Straits, what was he to do with them there? The Nespolitan war afcamers would infall bly stak his fibilities of fishing bosits at sees; by land he had at least a twenty days' march over sandy, dusty tracks, unaccaled roads, not smooth chough even for carriages, and making the convenance of artilizity an Herculean feat; he had before him this march under a broiling Calabrian sun, when the brooks were dred up, and under circumstances which threatened fever or cholers. (tople teersfore appeared to have gathered soo much from the remarkable feelities of stating which Garthaldi's Sicilian position gave him for his Neapolitan invasion. Any flaherman's boat, aided by a fresh wind, can throw herself upon the Calabrian coast almost in sight of the cruisers. It is only two miles across. So, party after party, of 250 or more—Major Corte's, Hijer Rissert's, and others—had crossed the Straits before Garionid. On landing they had at once gone up the Apennine riog; which ascands almost immentary from the coast, out of all reach of the Royal thops, lived as they could with the aid of the bounty of the peanstry, and descended when an occasion offered upon a coast fort. Garibaidi himself, after these experiments of landing had been treed and anceceded, fallowed with 1,500 THE SIGNAL SUCCESSES OF GARIBALDI. MAGRICULTURAL PAIRS EXCHANGE ON ENGLAND. DARKER & RAYMOND, General Commission Merchants. The grandfather of the Hon. John Covode of Pandyrvania was picked up at Amsterdam when a child of three or four years, put on a vensel, and brought to Philadelphia, where he was sold by the captain as a redemptioner vascelling off the war steamers from the stacked town, which might otherwise have considerably as a selected the defoces. "The town was clear in less than two hours from the time the hirst fire began." The fort alone remained. It answered with grape and froud shot till the rites of Miler. He never learned to read or write Aspent's corps from the opposite beight drove the Nespolitans from their game, and the desth of their commander caused the appearance of the white flag.

The signal piece of success at once gave 8 field pieces, 6 2 pounders, 15 position guns, and 500 stand of arms, besides a quantity of coal, ammunition and provisions, so the invading force; but it did more—it incapectated the whole of the Respolitan line of defence in the whole of the Respolitan line of defence in the rear. A succession of forts from Regio to Sylla, mounting on the average from 15 to 20 guos, and only strong towards the sea, and almost wholly overfock the attack from land. The first of these forts, then, taken, the rest from the American Consoli at Amsterdam on after another with hardly at effort, and the result is that the whole Calabree therefore commands each side of the Straits, and the result is that the whole Calabree therefore commands each side of the Straits, and the result is that the whole Calabree therefore commands each side of the Straits, and the result is that the whole Calabree therefore commands each side of the Straits, and the result is that the whole Calabree therefore commands each side of the Straits, and the result is that the whole Calabree therefore commands each side of the Straits, and the result is that the whole Calabree therefore commands each side of the Straits, and the result is that the whole Calabree therefore commands each side of the Straits, and the result is that the whole Calabree therefore commands each side of the Straits, and the result is that the whole Calabree therefore the command of the straits is now abandoned.
